What is Bluebonnet Farms Premium Organic Fertilizer 6-2-4?

Bluebonnet Farms Premium Organic Fertilizer 6-2-4 is a premium quality organic plant food and soil conditioner. When you use Bluebonnet Farms Premium Organic Fertilizer 6-2-4 not only are you feeding your lawn and garden plants in a healthy way, you are also providing the soil with rich nutrients, that are beneficial to soil bacteria and fortify the soil with nutrient-rich organic material. Bluebonnet Farms Premium Organic Fertilizer 6-2-4 contains nitrogen from organic sources which is gentle and won't burn your grass or plants. It's hard to use too much Bluebonnet Farms Organic Fertilizer. The product is in a convenient crumble form that is easy to spread. After using you may notice a fertilizer odor for a couple of days. This can be reduced by thoroughly watering any area that you apply the product. When you want a premium organic plant food product, choose Bluebonnet Farms Premium Organic Fertilizer 6-2-4.

-DIRECTIONS FOR USE-

NOTE: *When applying to newly seeded areas, always apply after seeds have sprouted.*

Lawn and Turf Grass

Apply 20 lbs. per 1,000 square feet. Use 25 lbs. per 1,000 square foot application rate when grass is in poor condition. Follow guidelines below for timing of seasonal applications.

-For Average Lawns: Apply a minimum of twice per year. Once in March or April and again in August or September.

Water very thoroughly to activate product.

-For Superior Lawns: Apply approximately every 60 days beginning in March with the final application in October or November.

Water very thoroughly to activate product.

Suggested Spreader Settings: Sears-8; Cyclone-10; Spyker-8; Scotts-13; Ortho Whirlybird Spreader-8; Fertilome Broadcast Spreader-8; Republic Broadcast-8.

Vegetables and Garden Plants: Apply 3 lbs. per 100 linear feet of row. Apply to plants once sprouted, by working the product into the top 3-4 inches of soil along side of each plant's stem. May be applied a second time approximately midway through the season by placing 2 lbs. per 100 linear foot at row along side of each plant's stem. Work lightly into soil. Always water after application to activate.

Trees: Apply 1 lb. per inch of trunk diameter by spreading under tree canopy area. Lightly rake soil for maximum utilization and water slowly and thoroughly. Apply twice annually once in spring and once in summer. Always water after application to activate.

Flowers and Ornamental Beds: Sprinkle generously throughout bed and incorporate into soil. Always water after application to activate. Always apply after seeds are sprouted.

Roses and Shrubs: Apply 1/4-1/2 cup per bush over root area. Apply at least twice per season. Always water after application to activate.

Compost Pile Stimulant: Sprinkle generously into compost piles as you add material over time. Average levels are 5 to 10 lbs. lbs. per cubic yard of compost. Always water after application to activate.
